

# MARYLAND'S INTER-AGENCY OPIOID COORDINATION PLAN

Inter-Agency Opioid Coordinating Council

PREVENTION • TREATMENT • RECOVERY

Before it's **too late.**

March 2021

## Message from the Lieutenant Governor

The Hogan-Rutherford administration remains steadfast and committed to implementing a comprehensive, holistic approach to addressing Maryland's ongoing opioid and addiction crisis. The roots of the crisis are complex and its consequences for our state and our nation have touched nearly every aspect of our lives. The administration continues to focus on multidisciplinary efforts in prevention, education, treatment and recovery, and law enforcement to improve safety, health, and quality of life of Marylanders impacted by this public health crisis.

Governor Hogan established the Opioid Operational Command Center (OCC) in 2017, to improve communication, coordination, and collaborative efforts between state and local public health, human services, education, and public safety entities to reduce the harmful impacts of the opioid epidemic and substance use disorder on communities in Maryland. The OCC coordinates with approximately 20 state agencies as well as agencies and Opioid Intervention teams from the 24 local jurisdictions to ensure that their efforts are aligned with the administration's policy priorities. This coordination has proven vital during the coronavirus pandemic, which has eroded gains made in reducing opioid fatalities in 2019.

As chair of the Inter-Agency Heroin and Opioid Coordinating Council, I am encouraged by the continued commitment to assisting those with substance use disorders. I am also energized by the ongoing efforts to identify obstacles and create opportunities to improve resources and treatment during the pandemic and beyond. The following Inter-Agency Opioid Coordination Plan includes detailed descriptions of current programs and initiatives in Maryland to address the opioid epidemic, substance use disorder treatment, and recovery. The Coordination Plan also includes goals and strategies for implementation statewide.

As the public health crisis of addiction evolves, so must our response. We will continue to be faced with short-term and long-term effects of the coronavirus pandemic in the months and years to come. It is vital that we continue providing resources and support for those impacted by the opioid epidemic at every level here in Maryland. As the state reopens and normalcy returns, our hope is our strategic and comprehensive approach will rebuild our momentum, lead to a decline in opioid-related deaths, and increase the number of people receiving help and returning to a productive life.

A handwritten signature in black ink that reads "Boyd K. Rutherford". The signature is written in a cursive, flowing style.

Boyd K. Rutherford  
Lieutenant Governor

**Message from the Executive Director of the OOC**

On behalf of the Lt. Governor's Interagency Opioid Coordinating Council and the Opioid Operational Command Center, I am pleased to present Maryland's Interagency Opioid Coordination Plan for 2021. The plan details the history of the opioid crisis in Maryland and the actions that we are taking in response.

There was reason for cautious optimism when, in 2019, we saw the first annual decline in opioid fatalities in over a decade. The great progress that we made in reducing opioid-related mortality, however, was sadly reversed in 2020, a year of unprecedented hardship for nearly everyone one across the country amid the COVID-19 pandemic, especially those living with substance use disorder. Tragically, more lives were lost to opioid overdose in 2020 than in any other year.

Although this is disheartening, our past achievements show that we have the tools and the knowledge to reduce opioid-related overdoses once again. We are better positioned now than ever before to reverse the damage the pandemic has inflicted and to win back our hard-fought gains. Most importantly, we have a plan that details exactly how this can be done.

The Interagency Opioid Coordination Plan plays a vital role in our state's response to the opioid crisis. This plan identifies nine goals, with accompanying strategies and tactics, to combat opioid misuse and to reduce opioid-related morbidity and mortality. New this year are six priority projects. These include: (1) enhancing the state's infrastructure to respond to adverse childhood experiences, which are linked to negative health outcomes, including substance misuse; (2) establishing a comprehensive crisis response system so that people can access an appropriate level of care wherever they are; (3) three projects utilizing data to inform policy and programmatic decisions; (4) expanding recovery residences to create more opportunities for safe housing for people in recovery; (5) enhancing care coordination, including care for substance-exposed newborns and transportation for individuals seeking treatment; and (6) wraparound services for individuals who are justice-involved, to ensure access to information on treatment and other resources at all stages of the criminal-justice system.

By focusing our efforts on these priority projects and by strengthening proven practices and programs that led to success in the past, I know that we can overcome the challenge ahead of us. Together, through the coordinated efforts of our state agencies, our local partners, and individual stakeholders, we will meet this moment, we will save lives, and we will build a stronger Maryland in the years to come.

Thank you,

A handwritten signature in blue ink that reads "Steven R. Schuh".

Steven R. Schuh

Executive Director, Opioid Operational Command Center

**Acknowledgements**

The Opioid Operational Command Center would like to thank our state and local partners who contributed their time and expertise to Maryland’s Inter-Agency Opioid Coordination Plan. Addressing the opioid epidemic in a comprehensive manner requires an all-hands-on-deck approach, and we are grateful for the insight provided by our partners.

## Opioid Crisis Overview

Since Governor Larry Hogan declared a state of emergency in 2017 in response to the opioid epidemic, state agencies, local jurisdictions, and community organizations have made tremendous strides in addressing the crisis. The formation of the Opioid Operational Command Center (OOCC) has facilitated cross-organizational coordination of resources, and the establishment of local Opioid Intervention Teams (OITs) has brought together stakeholders from multiple disciplines to identify programs and practices that best fit each local community.

The rate of opioid-related fatalities in Maryland began showing signs of stabilization in 2019, with Maryland experiencing a 1.7 percent decline in opioid-related fatalities, the first annual decrease since the beginning of the crisis over a decade ago. While the decline was welcome news, the progress made was erased in the beginning of 2020, largely attributed to the complications caused by the coronavirus pandemic. From January through September of 2020, Maryland saw a 14.5 percent increase in opioid-related fatalities as compared to the first nine months of 2019.

## Background

In 2015, recognizing the increasing severity of the heroin and opioid overdose crisis, Governor Larry Hogan established the Heroin and Opioid Emergency Task Force and the Inter-Agency Heroin and Opioid Coordinating Council (IACC). Governor Hogan charged the task force with developing initial recommendations for addressing the crisis. The task force's final report in December of 2015 identified 33 recommendations, nearly all of which have been implemented. The IACC continues to meet quarterly as a subcabinet organization responsible for oversight of the statewide response.

In January of 2017, Governor Hogan established the OOCC within the IACC, and he established OITs in each local jurisdiction. Due to the accelerating rate of opioid-related fatalities, Governor Hogan signed an executive order on March 1, 2017 that declared a state of emergency related to the heroin and opioid crisis. The state of emergency activated the Governor's emergency-management authority, authorized the OOCC's executive director to direct the state-agency response, and spurred rapid coordination between state agencies and local jurisdictions. Additionally, Governor Hogan made a five-year, \$50 million general-fund budgetary commitment to address the crisis. This funding is used to support programs aligning with the Hogan Administration's policy priorities for combatting the crisis, which are: Prevention & Education, Enforcement & Public Safety, and Treatment & Recovery.

## Opioid Operational Command Center

The OOCC serves as the primary coordinating office for the state's response to the opioid crisis. As outlined in the February 2017 declaration of emergency and reiterated in the December 2018 executive order, the OOCC is responsible for coordinating with approximately 20 state agencies and all 24 local jurisdictions and OITs to ensure that their efforts are aligned with Governor Hogan's established policy priorities: *Prevention & Education, Enforcement & Public Safety, and Treatment & Recovery*. The OOCC is an extension of the Office of the Governor, and the OOCC Executive Director is a cabinet-level officer. Budgetarily, the OOCC is part of the Maryland Department of Health.

## **OOC Vision and Mission**

**Vision:** The OOC’s vision is that Maryland will be a healthier place where no one else falls victim to substance use disorder, where anyone impacted by substance use disorder can get the help they need, and where there is no more suffering from the misuse of substances.

**Mission:** Under the guidance of the Inter-Agency Heroin and Opioid Coordinating Council, the OOC will pursue the following mission elements to make our vision a reality:

- I. Develop the *Inter-Agency Opioid Coordination Plan*;
- II. Coordinate the opioid-related efforts of approximately 20 state agencies, our community partners, and all 24 local jurisdictions throughout the state;
- III. Identify “promising practices” that can be implemented throughout Maryland;
- IV. Assess gaps in statewide and local efforts to combat the opioid epidemic and work to fill those gaps;
- V. Facilitate communications and collect relevant data;
- VI. Provide financial support to assist local jurisdictions, state agencies, and community organizations to advance their efforts to combat the opioid crisis; and
- VII. Evaluate all opioid-related legislation and opioid crisis-related budget proposals.

## **State-Level Partner Roles and Responsibilities**

The OOC coordinates the statewide opioid crisis response through state partner agencies in the areas of health, human services, education, law enforcement/public safety, and emergency services. State partners serve as subject-matter experts on collaborative initiatives and are responsible for program development and implementation within their agencies. Non-governmental partners, including health care systems and associations, community and faith-based organizations, professional associations, and nonprofits and businesses, play a vital role in Maryland’s whole-community approach.

## **Local Opioid Intervention Teams (OITs)**

A key element of the statewide strategy is encouraging multidisciplinary collaboration and coordination among all levels of government. To provide direction and coordination among stakeholders at the local level, all 24 jurisdictions have established OITs, which function as local jurisdictional, multi-agency coordinating bodies. The purpose of an OIT is to bring together representatives from different local agencies to advance local programming, to identify gaps and opportunities and to coordinate resources. OITs are led jointly by each jurisdiction’s health officer and emergency manager and include governmental and community partners from local agencies, providers, and community groups. OITs are responsible for developing a community strategy to address opioid addiction and substance use disorder (SUD) in their community. OITs also identify priority areas for programming and allocate OIT grant funding to those areas. Most OITs meet on a monthly or quarterly basis to discuss progress in priority areas and gaps that need to be addressed.

## Hogan Administration Policy Priorities

To address the opioid crisis in a comprehensive and systematic manner, Governor Hogan identified the following policy priorities: *Prevention & Education*, *Enforcement & Public Safety*, and *Treatment & Recovery*.

### Prevention & Education

## Opioid Operational Command Center

The Opioid Operational Command Center facilitates collaboration among state and local partners to reduce the harmful impacts of heroin and opioid misuse on Maryland communities.

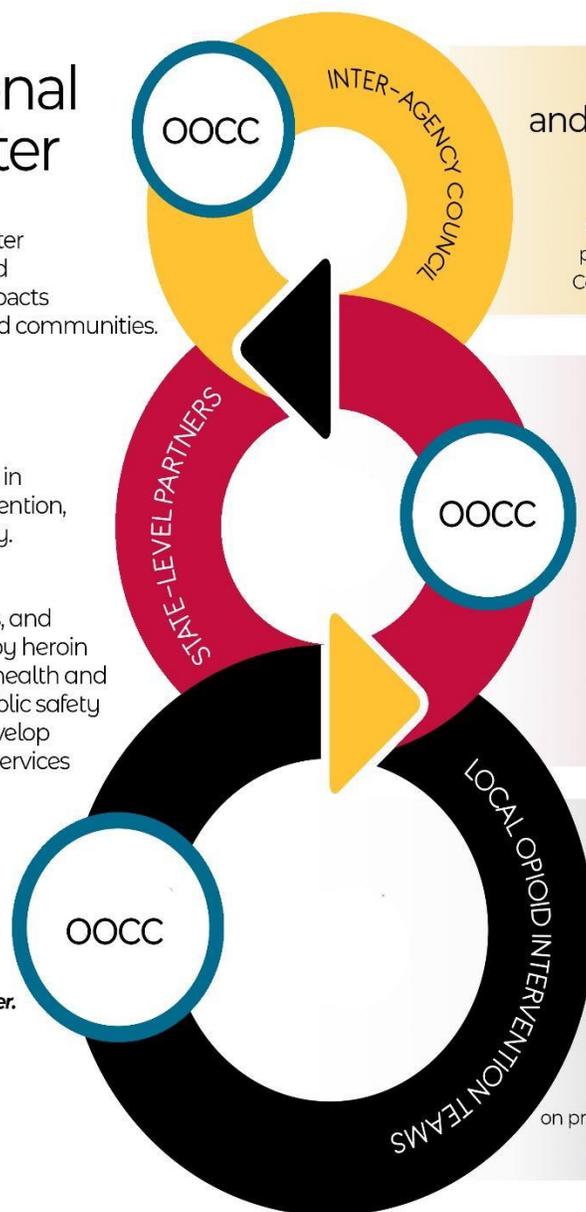

#### What does the OCCC do?

Combat the heroin and opioid crisis in Maryland through education, prevention, treatment, interdiction, and recovery.

#### Why?

Residents of all ages, races, genders, and areas across the state are affected by heroin and opioid misuse. State and local health and human services, education, and public safety officials are working together to develop community-based programs and services to combat this public health crisis.

**By working together with the Opioid Operational Command Center, partners share data, information, and ideas. Together, we can reduce the harmful impacts of heroin and opioid use and continue *changing Maryland for the Better*.**

### Inter-Agency Heroin and Opioid Coordinating Council

Chaired by Lt. Governor Boyd K. Rutherford, the Coordinating Council is the executive-level subcabinet of the Governor that develops strategic policy, provides authority for the Opioid Operational Command Center, and advises the governor's office.

### State-Level Partners

The OCCC coordinates with approximately 20 state agencies to ensure that efforts align with the Hogan Administration's policy priority areas: *Prevention & Education*, *Enforcement & Public Safety* and *Treatment & Recovery*.

In addition to partnering with state agencies, the OCCC coordinates with non-governmental partners to execute Maryland's whole-community approach to addressing the opioid crisis.

### Local Opioid Intervention Teams

Local Opioid Intervention Teams act as the local multi-agency, coordinating bodies within each of Maryland's 24 jurisdictions. The OITs are tasked with developing a unified local strategy, conducting operational coordination with all stakeholders, and working cooperatively on program and project implementation and operations.

In order to protect the current and future health and wellness of Marylanders, the OOCC supports programs and strategies that prevent current and future substance use and mitigates the consequences associated with SUD.

The OOCC categorizes prevention strategies as either *primary prevention* or *harm reduction*. Primary prevention strategies aim to reduce individual and environmental risk factors while increasing protective factors to prevent or delay the onset of drug use. Examples of primary prevention strategies include public health messaging campaigns, school curricula that address the risks associated with substance use, and initiatives that support the safe storage and disposal of prescription drugs.

Harm reduction strategies aim to meet drug users where they are by offering a spectrum of services. These services range from mitigating the negative health effects of drug use to abstinence programs.<sup>1</sup> Strategies that reduce harm related to drug use provide an opportunity for individuals who use drugs to engage with systems of care in a dignified and humane manner. Examples of harm reduction programming in Maryland include targeted naloxone distribution through the Maryland Department of Health's supported Overdose Response Programs (ORPs) and emergency medical systems (EMS) naloxone leave-behind programs. Additionally, local jurisdictions and community organizations have begun expanding access to harm reduction services through the provision of wound-care treatment and by distributing harm reduction tools such as fentanyl test strips.

### **Enforcement & Public Safety**

Law enforcement and public safety officials play a critical role in addressing the opioid crisis. Reducing the supply of illicit drugs remains a priority, and law enforcement agencies are using innovative technologies to identify, arrest, and prosecute large-scale drug traffickers.

While reducing the drug supply is a high priority, the OOCC does not believe that the opioid crisis can be solved by a focus on arrests alone. Public safety officials are in a unique position to help individuals by diverting or deflecting arrests and by connecting those in need with treatment and other resources. Four jurisdictions in Maryland have established pre-arrest diversion programs, and several others have expressed interest in creating such programs.

In many ways, the opioid crisis has encouraged public health and public safety officials to work closer together to identify opportunities to support people in need of substance use disorder (SUD) treatment services and to coordinate community services for individuals upon release. Local detention centers

<sup>1</sup>Source: Harm Reduction Coalition

often encounter individuals in need of SUD services, and the opioid crisis has encouraged local health departments to provide resources to detention centers to assist in screening and identifying individuals in need of treatment. Maryland was proactive in recognizing that a significant proportion of individuals engaged with the criminal justice system have substance use disorder (SUD). In 2019, HB116: Opioid Screening and Treatment in Correctional Settings was passed by the Maryland General Assembly and signed into law by Governor Hogan. This legislation requires that all local detention centers offer all three forms of FDA-approved medications to treat opioid use disorder by 2023. Four Maryland counties began implementing the requirements of the legislation in 2020 and six more jurisdictions will come onboard in 2021.

## **Treatment & Recovery**

SUD is a complex disease, and no single treatment is appropriate for everyone. Treatment for SUD should be individualized to meet the needs of the person. SUD treatment services, interventions, and care settings should be tailored to provide individuals with the greatest opportunity for successful outcomes<sup>2</sup>.

Individuals should be able to access all levels of substance use treatment, ranging from outpatient services to medically managed, intensive residential care. Gaps in treatment services exist throughout Maryland, and the state is working tirelessly to identify opportunities to expand services to all geographic regions.

Although there are gaps, there are many efforts underway to expand treatment options for Marylanders. The Maryland Department of Health has actively promoted a model known as *Screening, Brief Intervention and Referral to Treatment (SBIRT)*. SBIRT is a tool for health care providers to identify individuals who may need behavioral health services and encourages them to connect those individuals to the appropriate level of care. The OCCC is partnering with the Maryland Behavioral Health Administration (BHA) to inventory treatment capacity at multiple levels of care to identify counties around the state in the greatest need of service expansion. Additionally, state health care leaders are identifying mechanisms for recruiting and retaining behavioral health workers.

The OCCC recognizes that, in order to provide a full continuum of care for individuals leaving SUD treatment, there needs to be stable housing to support long-term recovery. Additionally, the OCCC supports initiatives that provide care coordination for individuals in recovery, including services that range from enrolling individuals into health insurance plans to helping individuals identify employment opportunities.

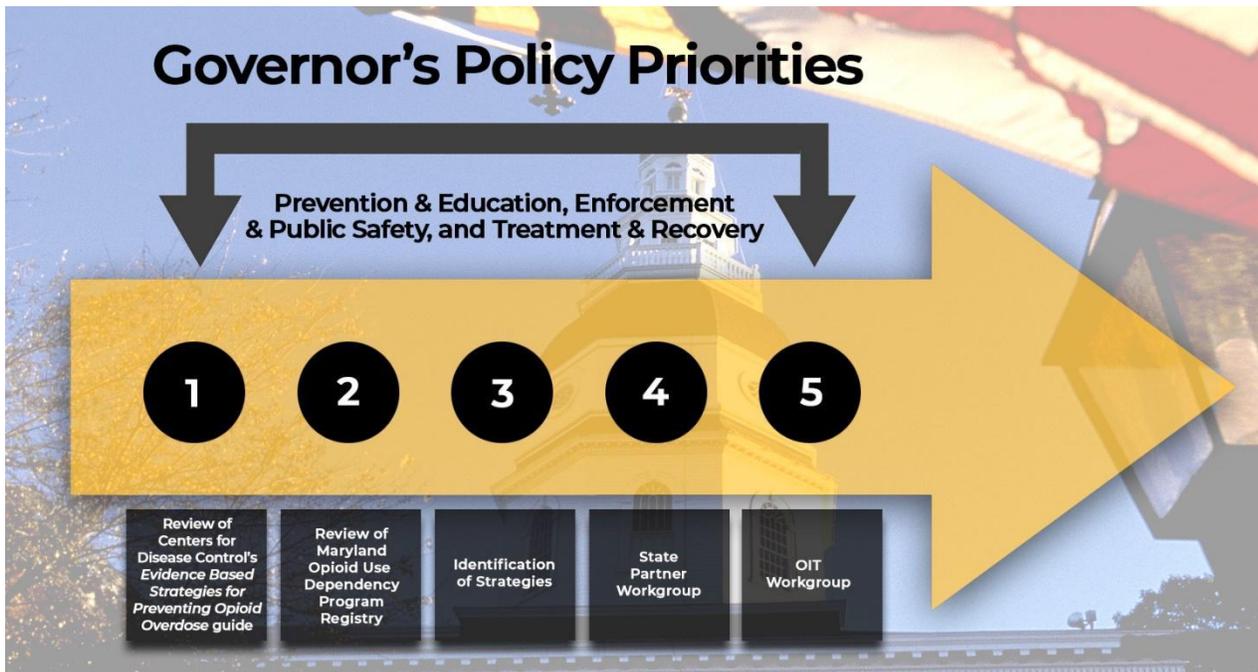

## **Coordination Planning Process**

To develop Maryland's *Inter-Agency Coordination Plan*, the OCCC used Governor Hogan's policy priorities of *Prevention & Education, Enforcement & Public Safety, and Treatment & Recovery* as a foundation. The OCCC also reviewed the Centers for Disease Control's *Evidence Based Strategies for Preventing Opioid Overdose* guide and the OCCC's *Substance Use Program Inventory* to develop a list of priority goals, strategies and implementation partners. These goals and strategies were presented to

---

<sup>2</sup>Source: National Institute on Drug Abuse, Principles of Drug Addiction Treatment: A Research Based Guide (Third Edition)

leaders of state agencies and local OITs. During these coordination planning sessions, partners provided critical feedback on language, feasibility, and historical context for each of the proposed strategies.

## Coordination Plan Overview

Shown below is an overview of the coordination plan. This overview outlines the nine goals identified in the plan based on policy priority. Following the overview is the comprehensive coordination plan that lists goals, strategies, tactics and implementation partners. For clarity, this coordination plan defined a **goal** as a broad, desired outcome; a **strategy** as an approach that will be taken to achieve a goal; and a **tactic** as the specific actions that will be taken to implement a strategy.

# Coordination Plan Overview

## **PREVENTION & EDUCATION**

- GOAL 1:** Prevent problematic opioid use.
- GOAL 2:** Reduce opioid-related morbidity & mortality.
- GOAL 3:** Enhance statewide systems to inform strategy.

## **ENFORCEMENT & PUBLIC SAFETY**

- GOAL 1:** Reduce Illicit drug-supply.
- GOAL 2:** Expand access to SUD treatment in criminal justice system.
- GOAL 3:** Expand alternatives to incarceration for individuals with SUD.

## **TREATMENT & RECOVERY**

- GOAL 1:** Ensure access to SUD treatment.
- GOAL 2:** Expand the behavioral health workforce and increase workforce competencies.
- GOAL 3:** Ensure access to recovery support services.

PREVENTION • TREATMENT • RECOVERY

**Before it's too late.**

Before It's Too Late is the statewide effort to bring awareness to the rapid escalation of the heroin, opioid, and fentanyl crisis in Maryland, and to mobilize all available resources for effective prevention, treatment, and recovery *before it's too late.*

**Coordination Plan:  
Goals, Strategies, Tactics and  
Implementation Partners**

# Outcomes

## Outcomes

Measuring the progress of each goal is a critical component of the coordination plan. Primary health outcomes and secondary outcomes have been identified to track Maryland’s progress in addressing the opioid crisis. Primary health outcomes are those that directly relate to an individual’s health. Secondary outcomes are those that support the objective of improving primary health outcomes. Below please find a chart outlining primary health outcomes and secondary health outcomes that will be tracked throughout the next four years.

| Primary Health Outcomes   |  |  |            |
|---|--|--|------------|
| Goal  | Outcome  | Data Source                                    | Frequency  |
| <b>Goal 1: Prevent Problematic Opioid Use.</b>                    | Reduce non-medical use of prescription drugs for individuals 12+ in Maryland.        | National Survey on Drug Use and Health (NSDUH) | Biennially |
|   | Reduce the number of Maryland youth reporting non-medical use of prescription-drugs. | Youth Risk Behavior Survey (YRBS)              | Biennially |
|   | Reduce heroin use for individuals 12+ in Maryland.                                   | NSDUH  | Biennially |
|   | Reduce the number of youth in Maryland reporting lifetime heroin use.                | YRBS   | Biennially |
| <b>Goal 2: Improve Opioid- Related Morbidity &amp; Mortality.</b> | Reduce non-medical use of prescription drugs for individuals 12+ in Maryland.        | National Survey on Drug Use and Health (NSDUH) | Biennially |
|   | Reduce the number of Maryland youth reporting non-medical use of prescription-drugs. | Youth Risk Behavior Survey (YRBS)              | Biennially |

| Primary Health Outcomes  |  |   |   |
|--|--|---|---|
| Goal   | Outcome  | Data Source   | Frequency   |
| <b>Goal 2: Improve Opioid- Related Morbidity &amp; Mortality (cont'd).</b>                 | Reduce the percentage of substance-exposed newborns placed into foster care within 90 days of birth. | Department of Human Services (DHS)                  | Annually  |
|  | Reduce the incidence of hepatitis C transmission.  | MDH   | Annually  |
| <b>Goal 3: Enhance Statewide Systems to Inform Strategy.</b>                               | Develop a public-facing data dashboard.  | OCC Tracking  | Annually  |
| <b>Goal 4: Reduce Illicit Drug Supply.</b>   | Increase coverage of HIDTA sponsored heroin/overdose coordinator program.                            | HIDTA/ Local OIT Reporting                          | Quarterly   |
| <b>Goal 5: Expand Access to SUD Treatment in the Criminal Justice System.</b>              | Local detention centers will comply with the requirements outlined in HB 116.                        | GOCPYVS/Local OIT Reporting                         | Annually  |
| <b>Goal 6: Expand alternatives to Incarceration for Individuals with SUD.</b>              | Increase the number of diversion and deflection programs.  | GOCPYVS   | Annually  |
| <b>Goal 7: Ensure Access to Evidence Based SUD Treatment</b>                               | Increase the number of individuals connected to SUD treatment.                                       | Substance Abuse and Mental Health Services (SAMHSA) | Annually  |
| <b>Goal 8: Expand the Behavioral Health Workforce and Increase Workforce Competencies.</b> | Increase the number of licensed behavioral health professionals practicing in Maryland.              | Licensing Boards                                    | Increase the number of licensed behavioral health professionals practicing in Maryland. |
| <b>Goal 9: Ensure Access to Recovery Support Services.</b>                                 | Increase the number of sober-living residences in Maryland.  | BHA   | Annually  |

## OOCC Priority Projects

The following projects have been identified as priorities for the OOCC for 2021:

**Enhance State Infrastructure to Respond to Adverse Childhood Experiences (ACEs):** The science connecting ACEs to negative health outcomes, including substance misuse, is well-established. The OOCC is committed to working with community-based organizations and state partners to develop a comprehensive and coordinated statewide strategy to address and mitigate ACEs. To connect multi-agency efforts in this area, the OOCC is engaging the National Governors Association (NGA) to provide technical assistance to promote a coordinated response. The NGA will work with Maryland through mid-2021 to provide technical assistance on the development of a strategic plan that addresses the negative impacts of ACEs for individuals of all ages.

**Establishment of a Comprehensive Crisis Response System:** The OOCC believes that individuals in need of crisis services should be able to access the appropriate level of care regardless of where they are located. We have worked diligently with the Crisis Services Subcommittee of the Lt. Governor's Commission to Study Mental and Behavioral Health and MDH to identify gaps in crisis services across the state. The OOCC will continue to help identify the most critical crisis services that can be expanded statewide and to work with partners wherever possible to do so. Projects that the OOCC will monitor include the Health Services Cost Review Commission's Regional Catalyst Grants Program, the development of BHA's Maryland Crisis Model, and the Maryland Medicaid Administration's Outpatient Mental Health Clinic pilot program.

**Utilizing Data to Inform Policy and Programmatic Decisions:** Access to data is the cornerstone for monitoring trends related to the opioid crisis. Through the utilization of multiple datasets, policymakers can allocate resources more efficiently to serve those at greatest risk for overdose. The OOCC has been working actively on several projects that aim to utilize data more effectively to drive decision making. These projects include:

- I. *Data-Informed Overdose Risk Mitigation (DORM)* – The goals of the DORM initiative are to examine the prescription and treatment history of individuals who died from opioids and other substance-related overdoses in the preceding four years to identify predictive factors. The program will provide a report to the Governor and the Maryland General Assembly that includes:
  - an assessment of overdose risk factors and programs targeting opioid use and misuse;
  - methods of intervening with at-risk populations; and
  - recommendations for improving SUD prevention, response, and data-collection efforts.

In the coming year, the OOCC will partner with BHA to operationalize the goals outlined in Chapter 211 of 2018 House Bill 922, under which DORM was created. This will involve convening planning workgroups to identify ways in which the state can better utilize data to identify those at the greatest risk for overdose and to inform programmatic decision making.

- II. *Health Services Cost Review Commission (HSCRC) State Integrated Health Improvement Strategy* – The Statewide Integrated Health Improvement Strategy (SIHIS) is an initiative that aims to mobilize and align healthcare stakeholders across both the public and private sectors to

collaborate on and invest in improving health, addressing disparities, and reducing healthcare costs for Marylanders. Addressing the opioid crisis is one of three key priorities for this program. The OOC will partner with the HSCRC to identify goals, metrics, targets, and milestones to measure the state's progress in improving opioid-related mortality.

This effort will also incorporate the HSCRC's Regional Catalyst Grants Program to expand crisis infrastructure. It will also expand Screening Brief Intervention and Referral to Treatment (SBIRT) procedures to 200 primary care offices through the Maryland Primary Care Program (MDPCP).

- III. *Treatment Gaps Analysis* – In 2020, the OOC completed a treatment gaps analysis to assess existing treatment capacity across the state. The methodology of this analysis uses a relative comparison of local overdose mortality rates and population to identify potential gaps in service and to help better direct resources at the local and regional level. We are continuing to identify ways in which to deliver this information to jurisdictions to inform state-and-county-level treatment planning.

**Recovery Residences Expansion:** Safe and secure housing is an important component for individuals in the early stages of recovery. Sadly, however, people seeking recovery housing are not always able to find it. The OOC is committed to partnering with BHA and the Behavioral Health Advisory Council's Recovery Residences Workgroup to identify barriers to the expansion of recovery residences, including regulations (such as fire codes) and medication assisted treatment (MAT) policies.

**Care Coordination:** Individualized and collaborative care for those with SUD can dramatically improve health outcomes. As such, the OOC has identified several opportunities to promote improved care coordination across all policy priorities in the Coordination Plan. In the coming year, the OOC has identified two priority areas where we will collaborate to enhance the continuum of care for people in treatment and recovery. These priorities include:

- IV. *Substance Exposed Newborns (SENs)* – The OOC will partner with the Department of Human Services (DHS) in their efforts to disseminate the newly created *SENs Collaborative Team Toolkit*. The goal of the SENs Collaborative Team is to bring together stakeholders involved in the service delivery and continuum of care for substance-exposed newborns and affected parents or caregivers to improve outcomes and enhance service delivery/practice. Once disseminated, the OOC and DHS will work with local jurisdictions to identify opportunities to leverage partnerships and share best practices to advance the goals of the SENs Collaborative.
- V. *Transportation* – The OOC is working to identify ways in which individuals who are interested or engaged in treatment can access services with fewer barriers, including enhancing transportation options. Transportation is often a determining factor for individuals who are entering treatment and would otherwise lack access to care.

**Wraparound Services for Individuals Who Are Justice-Involved:** A large proportion of individuals who are justice-involved have substance use and mental health disorders. The OOC is committed to ensuring that these individuals are able to access information on treatment and other resources at all stages of the criminal justice system.

In November 2020, the OOC partnered with the Crisis Services and Public Safety Subcommittees of the Lt. Governor's Commission to Study Mental and Behavioral Health to co-host the first statewide

Sequential Intercept Model (SIM) summit in Maryland. The SIM is a method for assessing available behavioral health resources throughout the criminal justice system with the goal of identifying gaps in available services and opportunities for service expansion. The summit brought together behavioral health and criminal-justice stakeholders from across the state to explore how the SIM framework could be used to improve outcomes for adults with mental and substance use disorders who are involved or at risk for involvement in the criminal justice system. In 2021, Maryland will evaluate a report based on the outcomes of the summit that outlines recommendations on how to fill gaps within the six “intercepts” outlined in the SIM framework. The OOCC will collaborate with partners from the Mental and Behavioral Health Commission and various state agencies to identify opportunities for operationalizing these recommendations.

# Appendices

## Appendix A: Executive Order

# The State of Maryland

## Executive Department

Executive Order  
01.01.2018.30

Inter-Agency Heroin and Opioid Coordinating Council  
(Amends Executive Order 01.01.2017.01)

- WHEREAS, The State of Maryland faces a heroin and opioid epidemic;
- WHEREAS, Heroin and opioid drug dependency surged in Maryland over the last decade, resulting in a dramatic increase in heroin-related emergency room visits;
- WHEREAS, The rise in the number of heroin and opioid overdose deaths represents an urgent and growing public health threat, cutting across all demographics and geographical settings in Maryland, and also represents a serious threat to the security and economic well-being of the State;
- WHEREAS, Maryland State agencies have different expertise, capabilities, and data that, when shared, can better inform a coordinated, statewide response to the opioid overdose epidemic;
- WHEREAS, Coordinated action among State agencies has made a greater impact in reducing abuse and overdose deaths; [and]
- WHEREAS, Local collaboration in the sharing of data, expertise, and capabilities, and in the delivery of services, can further reduce abuse and overdose deaths[.];
- WHEREAS, **FOLLOWING THE MARCH 1, 2017, DECLARATION OF A STATE OF EMERGENCY IN RESPONSE TO THE HEROIN, OPIOID, AND FENTANYL CRISIS, THE OPIOID OPERATIONAL COMMAND CENTER ESTABLISHED A RESPONSE FRAMEWORK THAT EMPHASIZED A MULTIDISCIPLINARY, MULTIAGENCY INCIDENT MANAGEMENT STRUCTURE TO MOBILIZE AND COORDINATE STATE AND LOCAL STAKEHOLDERS; AND**

**WHEREAS, THE HEROIN, OPIOID, AND FENTANYL CRISIS REQUIRES THE CONTINUATION OF THIS HEIGHTENED RESPONSE FRAMEWORK AND ONGOING COOPERATION AND MOBILIZATION OF STATE AND LOCAL STAKEHOLDERS;**

NOW, THEREFORE, I, LAWRENCE J. HOGAN, JR., GOVERNOR OF THE STATE OF MARYLAND, BY VIRTUE OF THE AUTHORITY VESTED IN ME BY THE CONSTITUTION AND LAWS OF MARYLAND, HEREBY AMEND EXECUTIVE ORDER 01.01.2017.01 AND PROCLAIM THE FOLLOWING EXECUTIVE ORDER, EFFECTIVE IMMEDIATELY:

- A. Establishment. There is a Governor's Inter-Agency Heroin and Opioid Coordinating Council (**THE "Council"**).
- B. Membership.
  - (1) The Council is a subcabinet of the Governor and shall consist of the heads of the following State **UNITS** [agencies] or their designees and such other [e]Executive **B**[b]ranch **UNITS** [agencies] as the Governor may designate:
    - (a) The Department of Health [and Mental Hygiene];
    - (b) The Department of State Police;
    - (c) The Department of Public Safety and Correctional Services;
    - (d) The Department of Juvenile Services;
    - (e) The Institute for Emergency Medical Services Systems; [and]
    - (f) The Maryland State Department of Education; **AND**
    - (G) **THE MARYLAND EMERGENCY MANAGEMENT AGENCY.**
  - (2) Staff members from the Offices of the Governor and Lieutenant Governor, including the Governor's Office of Crime Control and Prevention [and the Office of Problem Solving Courts], will also be regular participants.
  - (3) Other State **UNITS** [agencies] may be asked to participate at the invitation of the Chair.

C. Duties.

(1) The [member] State **UNITS** [agencies (Agencies)] listed in Paragraph B (1) (**THE "AGENCIES"**) shall seek opportunities to share data with one another and with the Office of the Governor for the purpose of supporting public health and public safety responses to the heroin and opioid epidemic. The Agencies shall share the data in their possession relevant to the epidemic to the maximum extent permitted by law.

(2) The Council shall develop recommendations for policy, regulations, or legislation to facilitate improved sharing of public health and public safety information among State **UNITS** [agencies].

(3) The Council shall update the Governor within 45 days of the date of this Executive Order, and biannually thereafter, on **THE AGENCIES'** [each agency's] efforts to address heroin and opioid education, treatment, interdiction, overdose, and recovery.

(4) On behalf of the Council, the [Department of Mental Health and Hygiene] **OPIOID OPERATIONAL COMMAND CENTER** shall submit an annual report to the Governor and the public in the form of the Inter-Agency Heroin and Opioid Coordination Plan.

D. Procedures.

(1) The [Secretary of the Department of Health and Mental Hygiene] **LIEUTENANT GOVERNOR** shall chair the Council. The Chair shall:

- (a) Oversee the implementation of this Executive Order and the work of the Council;
- (b) Determine the Council's agenda; and
- (c) Identify additional support as needed.

(2) The Council shall meet on a quarterly basis, or more frequently if the members deem appropriate.

(3) In advance of each meeting of the Council, each of the Agencies shall provide updates to the Chair regarding **ITS** [the agency's] efforts to share public safety and public health information relating to the heroin and opioid epidemic.

(4) A majority of the Council members shall constitute a quorum for the transaction of any business.

(5) The Council may adopt other procedures as necessary to ensure the orderly transaction of business.

E. Opioid Operational Command Center.

**(1) TO REFLECT THE NEED FOR AN ONGOING HEIGHTENED RESPONSE FRAMEWORK TO THE HEROIN, OPIOID, AND FENTANYL CRISIS, [T]There is an Opioid Operational Command Center (THE "Center") within the [Council] THE MARYLAND EMERGENCY MANAGEMENT AGENCY.**

**(2) THE CENTER SHALL BE MANAGED BY AN EXECUTIVE DIRECTOR, WHO SHALL BE PRIMARILY RESPONSIBLE FOR COORDINATING INTERAGENCY ACTIVITIES IN RESPONSE TO THE HEROIN, OPIOID, AND FENTANYL CRISIS THROUGHOUT THE STATE AND SHALL BE THE STATE'S PRINCIPAL COORDINATOR WITH LOCAL, REGIONAL, AND FEDERAL COUNTERPART ORGANIZATIONS ON ISSUES RELATED TO THE HEROIN, OPIOID, AND FENTANYL CRISIS.**

**(3) THE EXECUTIVE DIRECTOR IS RESPONSIBLE FOR THE DAILY OPERATION AND ADMINISTRATION OF THE CENTER. THE EXECUTIVE DIRECTOR SHALL SERVE AT THE PLEASURE OF THE GOVERNOR.**

**(4) The Center shall:**

**(a) Develop operational strategies to continue implementing the recommendations of the Heroin and Opioid Emergency Task Force authorized by Executive Order 01.01.2015.12;**

**(b) CONTINUE TO CARRY OUT MARYLAND'S CENTRALIZED, COORDINATED RESPONSE TO THE HEROIN, OPIOID, AND FENTANYL CRISIS THROUGH THE IMPLEMENTATION OF THE INTER-AGENCY HEROIN AND OPIOID COORDINATION PLAN REQUIRED BY PARAGRAPH (C)(4);**

**([B]C) Collect, analyze, and facilitate the sharing of data relevant to the epidemic from state and local sources while maintaining the privacy and security of sensitive personal information;**

**([C]D) Develop [a] memorandA[um] of understanding among state and local agencies that provide[s] for the sharing and collection of health and public safety information and data**

relating to the heroin [and], opioid, AND FENTANYL epidemic;

([D]E) Assist and support local agencies in the creation of Opioid Intervention Teams that will share such data; [and]

([E]F) Coordinate the training of and provide resources for UNITS OF state and local GOVERNMENT [agencies] addressing the threat to the public health, security, and economic well-being of the State **POSED BY THE HEROIN, OPIOID, AND FENTANYL CRISIS[.]; AND**

**(G) PROVIDE STAFF TO THE COUNCIL.**

**F. OPIOID INTERVENTION TEAMS.**

**(1) PRIOR TO RECEIVING FUNDS FROM THE CENTER, EACH COUNTY AND THE CITY OF BALTIMORE ("COUNTIES") SHALL ESTABLISH AN OPIOID INTERVENTION TEAM. AN OPIOID INTERVENTION TEAM SHALL INCLUDE, BUT IS NOT LIMITED TO, INDIVIDUALS WITH EXPERIENCE IN:**

**(A) EMERGENCY MANAGEMENT;**

**(B) HEALTH;**

**(C) LAW ENFORCEMENT;**

**(D) SOCIAL SERVICES;**

**(E) EDUCATION; AND**

**(F) PRIVATE SECTOR, NON-PROFIT, COMMUNITY, AND FAITH-BASED ORGANIZATIONS.**

**(2) A COUNTY MAY DESIGNATE MULTIDISCIPLINARY AND MULTIAGENCY DRUG OVERDOSE FATALITY REVIEW TEAMS AS ESTABLISHED UNDER HEALTH – GENERAL ARTICLE § 5-902, LOCAL ADDICTION AUTHORITIES AS DEFINED IN HEALTH – GENERAL ARTICLE § 7.5-101, OR LOCAL BEHAVIORAL HEALTH AUTHORITIES AS DEFINED IN HEALTH – GENERAL ARTICLE § 7.5-101 AS THE OPIOID INTERVENTION TEAM.**

**(3) OPIOID INTERVENTION TEAMS WILL DISTRIBUTE ANY FUNDS THE CENTER PROVIDES TO LOCAL**

**GOVERNMENTS AND UNITS AS PROVIDED FOR IN THE STATE BUDGET.**

**G. OPIOID SPENDING PLANS.**

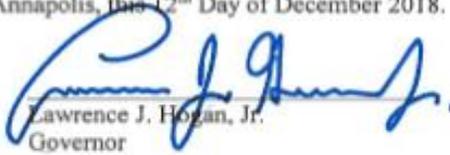

**(1) EACH UNIT OF STATE GOVERNMENT SUBJECT TO THE SUPERVISION AND DIRECTION OF THE GOVERNOR THAT SPENDS FUNDS TO ADDRESS THE HEROIN, OPIOID, AND FENTANYL CRISIS SHALL SUBMIT TO THE CENTER:**

- (A) BY SEPTEMBER 1 OF EACH YEAR, AN ANNUAL SPENDING PLAN FOR ALL FUNDING USED TO ADDRESS THE HEROIN, OPIOID, AND FENTANYL OVERDOSE CRISIS;**
- (B) ALTERATIONS TO THE PLAN THAT EXCEED \$2 MILLION; AND**
- (C) ACCOUNTS OF NEW SPENDING OF FUNDS THAT EXCEED \$2 MILLION USED TO ADDRESS THE HEROIN, OPIOID, AND FENTANYL CRISIS.**

**(2) THE CENTER SHALL PROVIDE ADVICE AND CONSENT ON EACH ANNUAL PLAN, ALTERATIONS TO THE PLAN THAT EXCEED \$2 MILLION, AND NEW SPENDING OF FUNDS THAT EXCEED \$2 MILLION.**

GIVEN Under My Hand and the Great Seal of the State of Maryland, in the City of Annapolis, this 12<sup>th</sup> Day of December 2018.

  
Lawrence J. Hogan, Jr.  
Governor

ATTEST

  
John C. Wobensmith  
Secretary of State

## Appendix B: Glossary of Terms

**Addiction:** The most severe form of substance use disorder, associated with compulsive or uncontrolled use of one or more substances.<sup>3</sup>

**Adverse Childhood Experiences (ACEs)<sup>4</sup>:** Potentially traumatic events that occur in childhood such as experiencing violence, abuse, or neglect; witnessing violence in the home; and having a family member attempt or die by suicide. ACEs have been linked to risky health behaviors, chronic health conditions, low life potential, and early death.

**Buprenorphine:** An FDA-approved medication used to treat opioid use disorder, specifically for opioid detoxification, induction or maintenance.

**Evidence-Based Practice:** Process of integrating evidence from scientific research and practice to improve the health of the target population.<sup>5</sup>

**Fentanyl:** A synthetic opioid approximately 50 times more potent than heroin and 100 times more potent than morphine. Fentanyl has been produced pharmaceutically and prescribed for the treatment of severe pain, but in recent years fentanyl has increasingly been produced and sold illegally.

**Harm Reduction:** A set of practical strategies and ideas aimed at reducing the negative consequences associated with drug use.

**Medication Assisted Treatment (MAT):** The combination of behavioral interventions and medications to treat substance use disorders.<sup>1</sup>

**Methadone:** An FDA-approved OAT medication used to treat opioid use disorder, specifically for opioid detoxification or maintenance.

**Naloxone:** An FDA-approved medication that displaces opioids and reverses the effects of an opioid overdose (e.g., difficulties breathing).

**Naltrexone:** an FDA-approved medication used to treat alcohol use disorder and opioid use disorder.

**Opioid:** A class of substances that bind to opioid receptors in the brain. Opioids block pain and produce effects such as elevated mood and drowsiness. Common opioids include prescription opioids, heroin, and fentanyl.

**Opioid Agonist Therapy (OAT):** Long-acting medications that bind to opioid receptors and help manage opioid withdrawal symptoms and cravings (e.g., methadone and buprenorphine).

<sup>5</sup> Vanagas, G., Bala, M., & Lhachimi, S. K. (2017). Evidence-Based Public Health 2017. *BioMed research international*, 2017, 2607397. doi:10.1155/2017/2607397

**Opioid Intervention Teams:** Local multi-agency coordinating bodies within each of Maryland’s 24 jurisdictions. OITs are tasked with developing unified local strategy, conducting operational coordination with all stakeholders, and working cooperatively on program and project implementation and operations.

**Opioid Use Disorder (OUD):** A substance use disorder involving the problematic use of opioids.

**Peer Recovery Specialist:** An individual who uses lived experience in recovery to help others in their recovery journey. Peers can also receive formal training and education in order to work in the credentialed status of this role; the Certified Peer Recovery Specialist

**People Who Use Drugs (PWUD):** A person who actively uses drugs or has recently used drugs. Preferred over stigmatizing terms such as “abuser,” “addict,” “junkie,” or “user.”

**Physical Dependence:** Occurs when the body requires a specific dose of a particular drug, such as a prescription opioid, in order to prevent withdrawal symptoms. This can happen when a patient uses a drug long-term to manage pain with a medical condition. The body builds up a natural tolerance to the medication and becomes dependent on

**Opioid Misuse:** Non-medical use of opioids associated with negative health risks (e.g., overdose) or social consequences (e.g., poor performance at work or school).

**Promising Practices:** Policy or programmatic interventions that have been evaluated by the OCCC and are believed to be effective. Some, but not all of these practices are evidence-based.

**Recovery:** A process of change through which people improve their health and wellness, live self-directed lives, and strive to reach their full potential.<sup>6</sup>

**Screening, Brief Intervention and Referral to Treatment (SBIRT):** An evidence-based practice used to identify, reduce, and prevent problematic use, misuse, and dependence on alcohol and illicit drugs.<sup>7</sup>

**Substance Use Disorder (SUD):** A medical illness caused by repeated misuse of a substance or substances. Substance use disorders are characterized by clinically significant impairments in health, social function, and ability to control substance use and are diagnosed through assessing cognitive, behavioral, and psychological symptoms. Substance use disorders range from mild to severe and from temporary to chronic.<sup>1</sup>

**Synthetic Opioid:** A class of opioids that are designed to provide pain relief, and that mimic naturally occurring opioids, such as codeine and morphine. Synthetic opioids tend to be highly potent, which means only a small amount of the drug is required to produce a given effect and include drugs like tramadol and fentanyl.<sup>8</sup>
